

PORTICO

# Future-proof your digital content

**Preserve your collections with Portico**

Linda McCane. Threshold Verge. Acrylic painting. 2005. Part of Fine Arts Collection

**Preserve your collections with Portico, an archive that safeguards** the accessibility and usability of your digital files for the long term.

Trusted by more than 1,000 publishers and over 1,000 libraries worldwide, Portico validates, normalizes, and continually maintains your content so it remains secure and available for tomorrow's scholars and students.

# Preserve your collections easily and affordably

Roman. Dancing Lar. Bronze sculpture. 1st century CE.  
Part of Smith College: Van Buren Antiquities Collection

## Count on true preservation

True preservation of digital collections requires confronting the vulnerabilities of technology, such as rapidly obsolete file formats, operating systems, and software. You can safeguard the long-term usability of your collections with Portico, one of the world's leading preservation archives.

By validating, normalizing, and continually maintaining your content, Portico ensures your institution will continue to serve researchers, scholars, and students for generations to come. Plus, we preserve your content in three locations in different geographical regions for maximum security.

Need help uploading your collections? We also offer collection harvesting for preservation, with no limits to the number of objects, collections, or updates.

**Learn how we can future-proof your digital content at [about.jstor.org/preserve](https://about.jstor.org/preserve)**

**“Portico didn’t require developing any IT infrastructure to support it, and there was nothing we would have to do in terms of developing content for ingestion into the archive.”**

*James Van Mil*

Digital Projects & Preservation Librarian,  
University of Cincinnati Libraries

Through decades of offering trusted non-profit resources like JSTOR and Portico, ITHAKA has built the infrastructure services that enable you to make your collections discoverable without paywalls to a global community of faculty, students, and researchers, and to ensure your content remains accessible for generations to come.
