Amplify the reach of your collections with JSTOR

Harold Weston. Night Splendor. Oil on canvas. 1968. Part of Adirondacks and St. Lawrence River Valley

Your institution holds rich and unique collections that are critical to research, teaching, and learning. Yet these resources can be difficult for scholars to discover and use, and time consuming and expensive to support. We can help.

Share your collections openly on JSTOR, the platform where millions begin their academic work. Publishing to JSTOR is fast and reliable thanks to our easy collection-loader tool and a healthy system of backend support. Researchers can access your collections, without paywalls, alongside a rich trove of journals, books, images, and other primary source materials, bringing greater value to the learner and your institution.

Share your collections easily and affordably

“JSTOR is a trusted academic resource, easy and very intuitive to use. Google searches yield JSTOR results...the more routes we have to content in our collections the better. It’s a great opportunity to harness information and synergies across a disparate range of sources, collections and institutions.”

Deirdre Wildy,
Head of Special Collections & Archives,
Queen’s University Belfast

Join a robust platform for research and learning

Reach the scholars, faculty, and students around the world who need your collections for their research – without paywalls.

- Make your collections discoverable alongside relevant scholarly content, including ebooks, journals, research reports, images, and other primary source materials
- Promote your institution with a unique branded page for browsing, sub-collection groupings, and searching within your collections
- Take advantage of the JSTOR platform's robust search, innovative tools for teaching and learning, and usage data
- Receive ample storage, including 5 terabytes with the ability to upgrade

Experience global reach and usage

The first 300 institutions sharing 1,600 collections during our three-year pilot garnered more than 3.3 million item requests from 234 countries and territories, with 63% of that traffic coming from the open web.

- Magnify reach with continuous Google indexing
- Increase discovery with EBSCO Discovery Service™ (EDS), OCLC, and ProQuest/Ex Libris
- Evaluate impact with COUNTER 5-compliant usage statistics

Plus, it’s easy to build and publish your collections on JSTOR with the collection loader tool included in this service. If you need more help, we also offer collection harvesting, and can upload your collections, with no limits to the number of objects, collections, or updates.

Partner now to amplify the reach of your collections.
